Managing Neuropsychiatric Symptoms in Dementia: Evidence-Based Strategies

Practical non-pharmacological and pharmacological approaches for dementia care providers

Date: Friday, June 12

Time: 3:00–4:00 PM ET | 12:00–1:00 PM PT

Format: Free virtual webinar

Learn evidence-based strategies to manage neuropsychiatric symptoms in dementia. This webinar covers assessment, responding to acute symptoms, and both non-pharmacological and medication-based approaches—plus how to connect individuals and caregivers to sustainable, effective supports.

Who Should Attend

- Dementia care program staff
- Social workers, nurses, and care managers
- Primary care and specialty clinicians
- Community-based dementia care partners
